

HIGH TECH INNOVATIONS FOR THE  
GLASS INDUSTRY „MADE IN BAVARIA“.

## LA AUTOMOTIVE

### LIQUID ROLLER SYSTEM FOR AUTO GLASS

Grafotec LA AUTOMOTIVE Spray System is a specially designed roller system for applying liquid separator agents for the sag bending of windshields in the auto glass industry.

- Special contact free liquid roller system for windshield coating.
- Easy to use and efficient in terms of both energy consumption and release agent consumption.
- Flexible and adaptable to different production conditions.
- Reliable design and low-maintenance "Made in Bavaria".

GLASS INDUSTRY „MADE IN BAVARIA“.

## LA AUTOMOTIVE

### LIQUID ROLLER SYSTEM FOR AUTO GLASS

Grafotec LA AUTOMOTIVE Spray System is a specially designed roller system for applying liquid separator agents for the sag bending of windshields in the auto glass industry.

A high-speed roller with up to 6,000 revolutions per minute provides a fine spray that is applied to the glass homogeneously and without direct contact.

The Grafotec LA AUTOMOTIVE enhances both the reliability of the production process and the quality of the bending process.

#### Applicator bar with:

The applicator bar with photo cell, shutter drive and seat post allows fast and accurately replicable dosage of the separator agent – even during operation. With the geared shutter drive, the application can be adjusted, manually or automatically, to the glass sheet and to different plate sizes.

### Technical Specifications:

Application Type:	Contact free liquid roller system for windshield coating.
Release Agent:	Liquid separator agent for the sag bending of windshields.
Application Width:	1600 / 2200 / 2500 mm
Special Features:	<ul style="list-style-type: none"><li>✓ Automatic and manual application width adjustment.</li><li>✓ Automatic speed adjustment.</li><li>✓ Adjustable supply pump.</li><li>✓ Available automatic mixing of the separator agent.</li></ul>

All LA AUTOMOTIVE systems can be individually adjusted according to your needs and product lines.
